

## Photography tips to capture your temporary headshot

Once there's availability we can schedule your official studio headshot

If you have taken one with similar specs and not captured by a different marketing team, please share

Use a mobile phone or dslr camera if available

- Set to high-resolution if possible
- Background should be a solid color, preferably white, similar to a passport photo
- Stand in a well-lit area, natural or artificial light is suitable

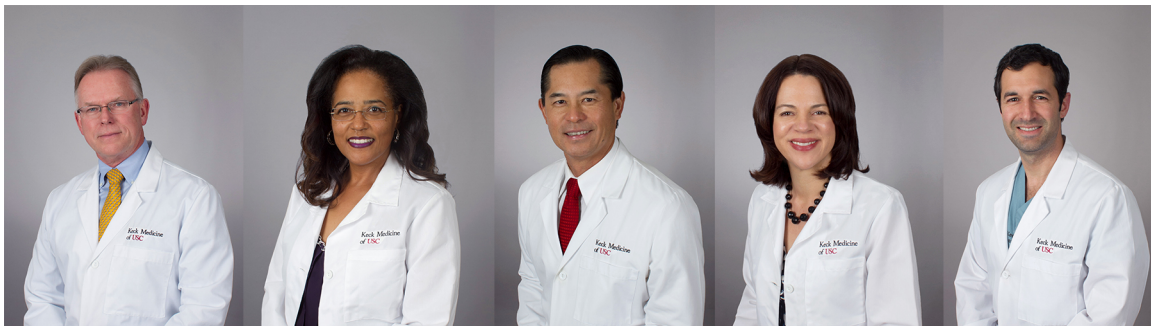

Capture your photo using the standardized look below

- Body facing to the left (your right)
- Smile (showing teeth or no-teeth is up to you)
- White coat preferably (if not available then a suit jacket or nice top of your choice)
- Crop photo a few inches above your head down to your mid-torso
- You want a friendly, approachable look for patients, take several and send your favorite, reshoots are common and even the smallest change can make a difference
